DISCLAIMER

All investing comes with risk.

It's important to do your own research.

DYOR (Do Your Own Research) is a common thing to hear when discussing blockchain investments.

Managing your risk is an important key when investing into decentralized finance.

Never invest more than you can lose.

You alone are responsible for your investment.

Smart Cash Capital is not responsible for any losses.

THE TEAM

The team consists of 5 people, which are all well-known and can be considered veterans in this space.

The team has already launched a ton of projects under them.

The team also has some partnerships for the promotion and growing the protocol.

Currently, the team has not KYC'd but is considered in the future.

PRESENTATION

Smart Cash Capital is a Diversified Investment Fund running on Binance Smart Chain.

The project is a combination of an ROI Dapp and a staking project in which the users have the option to unstake their investments.

For each stake, there is a 10% staking fee being deducted to the total amount to be staked.

These fees will be used for project maintenance, marketing and administration fees.

There will be no development tax when the users claim their dividends.

If the user decides to unstake their staked amount, there will be an unstake fee which will be deducted to the total amount to be unstaked. This fees will not go to the developers instead this will stay in the contract and will be used as rewards for existing investors.

There is a 3% referral rewards whenever a user used your referral link when investing into the project, this rewards can be used only as new stakes which will increase the users potential earning over time.

HOW IT WORKS

The daily dividends starts at 1% and can increase up to 3.5% depending on how long the stake is active. Staking more than 100 days will increase the users stake to 3.5%.

Basically it's a long term play and would benefit those people who will support the project longer.

For each stake, there is a 10% staking fee being deducted to the total amount to be staked. These are the fees that was mentioned to be used in investing to other projects and will also used to pay for the project maintenance, marketing and administration.

The only tax that the team will get is from new deposits, compounding and withdrawing will not have any tax, however, compounding and withdrawing existing stakes, will reset all your stake plans to 0, which means yield will reset to 1% and staked days to 0.

If the user decides to add new stakes, it will not affect all other existing stakes.

There is a 3% referral rewards whenever a user used your referral link when investing into the project, this rewards can be used only as new stakes which will increase the users potential earning over time.

UNSTAKING FEE

Unlike other protocols, your initial investment is never locked.

But take note that there are un stake fees which starts at 30% which can go lower to 5% depending on how long the stake of each stake plan is.

When you unstake your initial, rewards are paid out to you. Unstaking does not have an effect on any other stakes. Payouts are different if you unstake vs if you claim.

If the user decides to unstake their staked amount, there will be an un stake fee which will be deducted to the total amount to be unstaked. This fees will not go to the developers instead this will stay in the contract and will be used as rewards for existing investors.

If the user wants to unstake the compounded dividends, fees would be assessed according to the # of days that stake has been active. There are no taxes or fees associated with the compounding action whatsoever.

Keep in mind, compounding will create a new stake. If you wanted to unstake this new stake, fees would be assessed. No fees are taken when creating this stake via the compound option.

CHARTS

DIVIDENDS Chart

Level	Stake Length	Earnings
1	Day 1 - 20	1 % daily
2	Day 21 - 40	1.5 % daily
3	Day 41 - 60	2 % daily
4	Day 61 - 80	2.5 % daily
5	Day 81 - 100	3 % daily
6	Day 101 - ∞	3.5 % daily

UNSTAKE FEES Chart

Stake Length	Unstake Fee
Day 1 - 20	30%
Day 21 - 40	25%
Day 41 - 60	20%
Day 61 - 80	15%
Day 81 - 100	10%
Day 101 - ∞	5%
